DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

The closest prior art of record is Bloom et al. USP 6,061,663. Bloom discloses a computer system including a processor and a storage device storing a computer program product for rebalancing a capitalization weighted stock index are described. The computer program includes instructions for causing a computer to classify stocks in the index as a Large Individual Stock if a stock has a capitalization weight above or equal to a first threshold or as a Small Individual Stock if the stock has a capitalization weight below the first threshold. The computer program causes the computer to scale down the Large Individual Stocks by an excess capitalization weight of the large stocks and distribute an aggregated excess capitalization weight of the Large Individual Stocks over the capitalization weights of the Small Individual Stocks. An iterative redistribution of excess capitalization over all Small Individual Stocks can be used to provide for less than proportional distribution of excess capitalization to very small capitalized stocks. The index rebalancing software retains a capitalization weighting characteristic while permitting the index to conform to generally accepted accounting, economic and tax standards. Index rebalancing is accomplished while maintaining the original relative position of stocks and reducing the market impact of rebalancing on the Small Individual Stock group.

In regard to claim 1 and 40, Bloom taken individually or in combination with other prior art of record fails to teach or render obvious grouping the plurality

of financial instruments, based on market capitalization according to a criterion, into at least a first group of financial instruments and a second group of financial instruments, each financial instrument of the first group of financial instruments being associated with a company having a market capitalization that is larger than the market capitalization of each company associated with each financial instrument of the second group; using a computer to allocate a weight coefficient to each of said identified financial instruments based on a value of the market capitalization of each associated company relative to values of the market capitalization of others of the companies associated with the plurality of identified financial instruments; wherein allocating weight coefficients includes assigning a weight coefficient to each of the plurality of financial instruments such that for substantially any financial instrument associated with a first company having a market capitalization that is larger than a market capitalization of a second company, the financial instrument associated with the first company is assigned a weight coefficient that is greater than or substantially equal to the weight coefficient assigned to the financial instrument associated with the second company; wherein allocating weight coefficients includes assigning a weight coefficient to each of the plurality of financial instruments such that for each of the financial instruments of the first group, a ratio of (a) a first weight coefficient assigned to a first financial instrument of the first group to (b) a second weight coefficient assigned to a second financial instrument of the second group is less than a ratio of (c) the value of the market capitalization of the company

Art Unit: 3694

associated with the first financial instrument to (d) the value of the market capitalization of the company associated with the second financial instrument; creating an investment fund or an investment trust based on the identified financial instruments and the allocated weight coefficients by using a computer to purchase an amount of each of the identified financial instruments, the purchased amount being based on the weight coefficients; and substantially maintaining said purchased financial instruments for more than two years.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
